Bengaluru, Karnataka

Professional Summary

Product Owner and Knowledge Management leader with 16 years of experience across IoT, hardware, firmware, software, and cloud products, with strong experience translating business and customer needs into structured knowledge products, product requirements, and scalable content ecosystems. Experienced in product backlog management, user stories, acceptance criteria, stakeholder alignment, release planning, knowledge governance, taxonomy, metadata, and information architecture.

Proven experience leading global cross-functional teams and partnering with Product Management, Engineering, Marketing, Sales, Technical Services, and external vendors to deliver enterprise-scale product and knowledge outcomes. Experienced in building reusable, governed, and AI-ready content through structured authoring, metadata, taxonomy, content standardisation, and improved discoverability.

Product Owner experience includes roadmap execution, backlog prioritisation, requirements definition, feature validation, and release readiness for hardware and cloud/WebUI products. Developing GenAI-enabled knowledge management capabilities focused on enterprise search, retrieval, and intelligent consumption of trusted organisational knowledge.

Core Product & Knowledge Management Skills

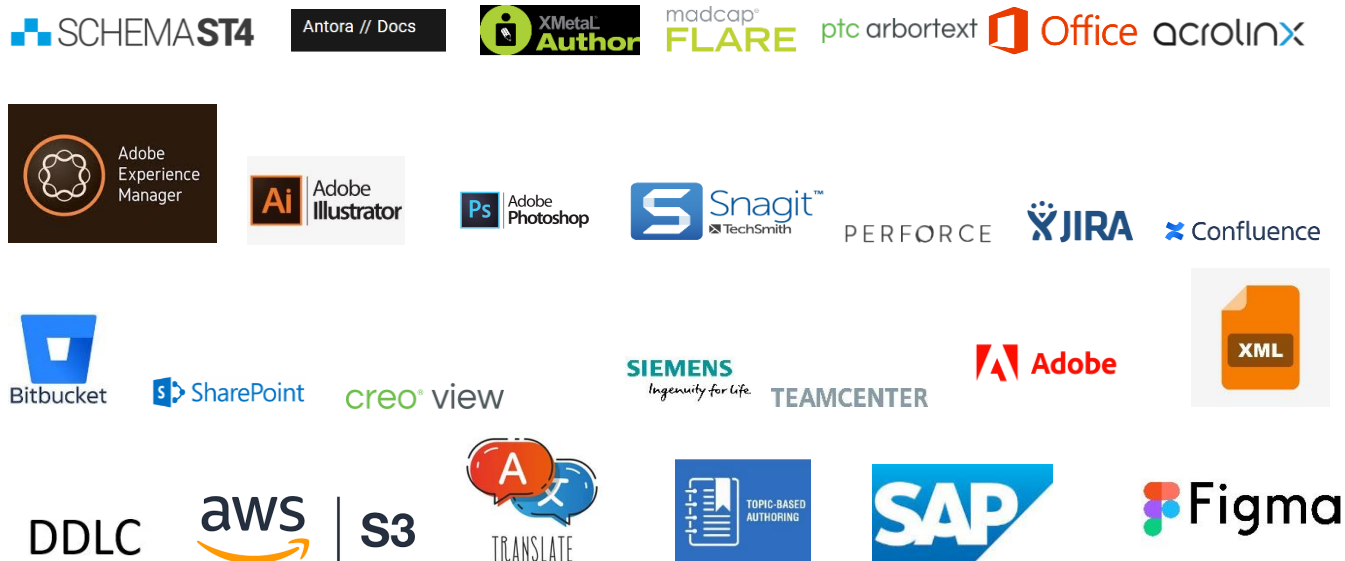

Product: Product Strategy & Roadmaps | Product Ownership | Backlog Prioritisation | Requirements & User Stories | Agile / Scrum | KPI & Operational Metrics

Knowledge Management: Knowledge Products | Information Architecture | Taxonomy | Metadata | Content Governance | Knowledge Lifecycle | AI-Ready Content | Content Reuse & Discoverability

Leadership: Stakeholder Management | Cross-Functional Leadership | Global Team Leadership | Vendor Management | Executive Communication | Change & Adoption

Platforms & Technology: AEM | JIRA | IoT | Cloud Product Lifecycle | Structured Authoring | Enterprise Content Platforms | Figma

Technical Skills

Professional Experience

Product Ownership & Agile Delivery

- Translated stakeholder and customer needs into business requirements, user stories, acceptance criteria, and actionable delivery initiatives supporting product roadmap execution.
- Performed Product Owner responsibilities for hardware and WebUI/cloud product releases, partnering with engineering and business stakeholders through planning, validation, and release readiness.
- Participated in backlog prioritisation, sprint planning, feature validation, and release governance using JIRA.
- Coordinated dependencies across hardware, firmware, software, and cloud releases to support integrated product delivery.
- Partnered with Product Management, Engineering, Marketing, Sales, and Technical Services to align priorities and support coordinated product delivery.
- Established operational KPIs, dashboards, and workflows to improve visibility, accountability, and delivery effectiveness.

Knowledge Management, Governance & AI Readiness

- Established structured knowledge management and content governance practices covering information architecture, taxonomy, metadata, reusable content models, review workflows, and lifecycle management.
- Improved enterprise content discoverability through taxonomy, metadata, structured authoring, reusable information models, and enhanced searchability.
- Prepared technical and product knowledge for AI-assisted consumption by standardising content structures, reducing duplication, and improving information retrieval.
- Built reusable knowledge assets including knowledge articles, troubleshooting guides, installation guides, runbooks, training modules, product documentation, and release content.

- Established quality controls including templates, peer reviews, compliance checks, and content standards to improve consistency and content quality.
- Led the evaluation and migration from open-source documentation tooling to Adobe Experience Manager (AEM) Guides, supporting a scalable and governed enterprise content ecosystem.
- Reduced documentation revision cycles by approximately 40% through governance, workflow standardisation, and operational improvements.

Led Global Collaboration:

- Coordinated documentation and CI/CD feature releases to support integrated product launches and release readiness.
- Partnered with Sales and channel teams to simplify complex product capabilities and strengthen partner enablement.
- Managed project schedules, risks, vendor dependencies, stakeholder communication, and delivery KPIs across global initiatives.

Drove Team Excellence:

- Led a global team of 15+ employees and vendors delivering customer-facing, developer, installation, training, and enablement content.
- Managed resource planning, delivery schedules, performance management, and team capacity across global initiatives.
- Delivered technical training to global audiences and trained and mentored 25+ resources on structured authoring, technical communication practices, and documentation standards.
- Established knowledge-sharing programs and continuous learning initiatives to strengthen product adoption.

Ensured Quality & Impact:

- Improved product adoption by creating clear, actionable, customer-centred documentation and enablement assets.
- Supported customer onboarding and reduced time-to-productivity through targeted training initiatives.

Education

- VSM Aerospace - Engineering in Aircraft Maintenance – 2009
- Bharathiyar university – MBA Systems – 2014

Certifications

- Tech total – Advanced technical writing certification – 2014
- Leadership trainings – ILead – Signify – 2025
- IoT Overview – Signify – 2026
- Leveraging IoT for Successful Digital Transformation – Signify – 2026
- Professional Scrum Product Owner I – Bootcamp – 2026
